The Investment Manager will not be targeting any international debt securities of any particular duration or coupon (“Non-Maltese Assets”). In addition, the Investment Manager will, at all times, maintain a direct exposure to local debt securities (debt securities and money market instruments issued or guaranteed by the Government of Malta and/or local corporate bonds issued and listed on the Malta Stock Exchange) of at least 25% of the value of the Net Assets of the Sub-Fund.

The Investment Manager will not be targeting any local debt securities (debt securities and money market instruments issued or guaranteed by the Government of Malta and/or local corporate bonds issued and listed on the Malta Stock Exchange) of any particular duration or coupon.

Investors may redeem units of UCITS on demand on every Business Day on any day that is not a Saturday or Sunday and not a public or national holiday in Malta

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Buying and Selling Shares: You can buy and sell Class B Investor Shares (this “Class”) on each business day (Monday to Friday other than public holidays in Malta).

Long-term investment: You should consider Shares in the Sub-Fund as a long-term investment. Since Entry Charges (see below) are deducted from your subscription amount, if you sell your Shares before the price of the Shares increases / dividends are paid you may receive less than the amount invested.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk & Reward Profile

The Sub-Fund’s rating reflects the nature of its expected investments and the corresponding risks to which the Sub-Fund is exposed. These risk factors, which include the risks listed to the right, may affect the value of the Sub-Fund’s investments or expose the Sub-Fund to losses.

Credit Risks: Bonds or other debt securities held by the Sub-Fund involve credit risk represented by the possibility of default by the issuer. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the NAV per Share.

Interest Rate Risk: The Sub-Fund is expected to be exposed to interest rate risk meaning the value of investments may fall if interest rates in European markets increase.

The risk and reward indicator rates this Sub-Fund as category 3 meaning that the Sub-Fund offers a moderate risk of making a loss but also a likewise moderate chance of making gains. It should be noted that even the lowest category on the indicator does not mean that the Sub-Fund is risk-free.

The Sub-Fund's rating is based on simulated data and therefore is not a reliable indication of the risk profile of the Sub-Fund. Furthermore, the rating shown is not guaranteed and may change over time.

Liquidity Risk: The Sub-Fund is expected to be skewed towards Maltese securities and hence may be exposed to liquidity risks in view of the thin levels of trading activity in Maltese securities =.

Concentration Risk: The Sub-Fund may be concentrated in a limited number of Maltese securities and as a result, may have significant risk exposure to country risk and issuer risk.

Currency Risks: The Sub-Fund may invest in assets designated in currencies other than in Euro. As a result, changes in the rates of exchange between currencies may cause the value of the Shares to go up or down.

For more information regarding risks, please see the Risk Factors section in the Prospectus. The section entitled "Practical Information" hereunder explains how you may obtain a free copy of the Prospectus and other useful information.
