

Global High Income Bond Fund is a Sub-Fund of CC Funds SICAV plc Class D (Distribution) Investor Shares (ISIN: MT7000003067)

Managed by Calamatta Cuschieri Investment Management Limited, part of the Calamatta Cuschieri group of companies

Objectives and Investment Policy

Objective: The Sub-Fund aims to maximise the total level of return for investors by investing, mainly, in a diversified portfolio of bonds and other similar debt securities.

Investment Policy: The Investment Manager (“We”) will primarily invest in corporate and government bonds maturing in the medium term (3 to 10 years maturity). We aim to construct a diversified portfolio for the Sub-Fund mainly composed of high yield bonds with an average credit quality of “Ba3” by Moody’s or “BB-” by S&P, although individual bond holdings may have higher or lower ratings.

We consider various factors when choosing which bonds to invest in, including: (i) yields; (ii) issuer specific variables; (iii) terms of issue of the securities; (iv) the experience and track record of the issuer’s management; and (v) market-technical factors. Generally, the bonds that we aim to buy are high yield (below investment grade) bonds with a target yield of 3% to 5% above the corresponding government security and with ratings of between “Baa1” and “Caa1” by Moody’s or “BBB+” to “CCC+” by S&P or be of comparable quality, subject to investing up to 10% in unrated bonds.

For temporary periods or where we think that market conditions require a cautious approach, we may also invest in short-term fixed income instruments, money market funds, cash and cash equivalents as well as investment grade corporate bonds and government bonds (bonds with a higher rating than above).

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub Fund within the limits of the Objective and Investment Policy.

Currency: The Shares in the Sub-Fund are denominated in USD.

Buying and Selling Shares: You can buy Class D (Distribution) Investor Shares (this “Class”) on each Business Day (Monday to Friday other than public holidays in Malta) for a lump sum investment. You can sell this Class of Investor Shares on each Business Day (Monday to Friday other than public holidays in Malta).

Distribution Policy: This Class is a distributor class so the income from investments held for the Class will be paid out as dividends rather than re-invested. The Company aims to declare dividends on the 31st March and 30th September each year.

Long-term investment: You should consider Shares in the Sub-Fund as a long-term investment. Since Entry Charges (see below) are deducted from your subscription amount, if you sell your Shares before the price of the Shares increases / dividends are paid you may receive less than the amount invested.

Recommendation: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within less than 3 years.

Risk & Reward Profile

The above risk and reward indicator rates this Sub-Fund as category 3 meaning that the Sub-Fund offers a relatively high risk of making a loss but also a relatively greater chance of making gains. It should be noted that even the lowest category on the indicator does not mean risk free.

The Sub-Fund’s rating on this indicator is based on a combination of simulated and historical data and therefore is not a reliable indication of the risk profile of the Sub-Fund. Further, the rating shown is not guaranteed and may change over time.

The Sub-Fund’s rating reflects the nature of its investments and the corresponding risks to which the Sub-Fund is exposed. These risk factors, which include the risks listed to the right, may affect the value of the Sub-Fund’s investments or expose the Sub-Fund to losses.

Credit Risks: Bonds or other debt securities held by the Sub-Fund involve credit risk represented by the possibility of default by the issuer. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated and/or unsubordinated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the NAV per Share.

Currency Risks: The Sub-Fund may invest in assets designated in currencies other than USD. As a result, changes in the rates of exchange between currencies may cause the value of the Shares to go up or down.

Charges and Expenses: Charges and expenses will be charged against capital, which may have the effect of constraining capital growth.

For more information regarding risks, please see the Risk Factors section in the Prospectus. The section entitled “Practical Information” overleaf explains how you may obtain a free copy of the Prospectus and other useful information.

Charges

The charges that you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	2.50%
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the Fund over each year	
On-going charge	1.42%
Charges taken from the Fund under specific conditions	
Performance fee	None

The **entry** and **exit** charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is an estimate of the charges. This figure may vary from year to year. It excludes portfolio transaction costs and any entry/exit charges paid by the Sub-Fund when buying or selling units in other collective investment undertakings.

For more detailed information about charges and how these are calculated, please see page 14 of the Sub-Fund's Offering Supplement. The section entitled "Practical Information" below explains how you may obtain a free copy of the Fund's Offering Supplement, the Prospectus and other useful information.

Past Performance

The chart on the left shows the Class D (Distribution) Investor Shares' annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the net asset value at each year-end on the basis that any distributable income of the Sub-Fund has been reinvested. The Performance data including tax, ongoing charges and portfolio transaction costs but excludes entry and exit Charges.

Past performance is not a guide to future performance.
