Investment Objective, Policy and Restrictions

Investment Objective

The objective of the Sub-Fund is to endeavour to maximise the total level of return for investors through investment primarily, in a well-diversified portfolio of debt securities and other fixed-income or interest bearing securities.

There is no guarantee that the investment objective of the Sub-Fund will be achieved and investment results may vary substantially over time.

Investment Policy

The Investment Manager shall invest primarily but not solely in a diversified portfolio of Emerging Market Corporate fixed income securities and Emerging Market Government fixed income securities with maturities of 10 years or less, rated at the time of investment “Baa1” to “Caa1” by Moody’s or “BBB+” to “CCC+” by S&P, or in bonds determined to be of comparable quality by the Investment Manager. The Investment Manager may also invest up to 10% of the Net Assets of the Sub-Fund in unrated fixed income securities.

The Investment Manager is expected to focus on Emerging Market fixed income securities, corporate and/or government, and seek to maintain an average credit quality of “B3” by Moody’s or “B-” by S&P, although issues may be rated lower or higher.

The Investment Manager will not be targeting debt securities of any particular duration and/or coupon, but will focus primarily on Emerging Market issuers (an Emerging Market country/economy is considered a country that forms part of the MSCI Emerging and Frontier Market Index at the time of investment).

The Investment Manager may invest in other fixed-income or interest bearing securities which may include short-dated bonds which have a maturity of 1-3 years, hybrid securities or certificates of deposits, issued primarily by but not solely Emerging Market Issuers.

The Investment Manager may also invest up to 15% of the Net Assets of the Sub-Fund in Emerging Market equities.

The Investment Manager will not be targeting equities of a particular market capitalisation.

The Investment Manager may invest in all of these asset classes either directly or indirectly through UCITS Funds and/or eligible non UCITS Funds.

The Investment Manager may invest in CISs established in the EEA countries or authorised under laws which provide that they are subject to supervision considered by the MFSA to be equivalent to that laid down in Community law.

The investment Manager will not invest in CISs with whom the Investment Manager is in/directly involved with.

The Investment Manager will not be investing in unlisted Transferable Securities and unlisted Money Market Instruments and any investments in Transferable Securities and Money Market Instruments on behalf of the Sub-Fund shall consist solely of those securities admitted to or dealt on an Approved Regulated Market.

The Investment Manager shall manage the credit risk and will aim to manager interest rate risk through credit analysis and credit diversity.

The Sub-Fund will hold a diversified portfolio of investments over a broad base of issuers and industries. By diversifying the Sub-Fund's portfolio, the Investment Manager believes that short maturities should reduce both the credit risk and market risk to the Sub-Fund as a result of inflation.

The Investment Manager considers various factors in evaluating securities for purchase by the Sub-Fund, including:

- a. Yield to maturity, yield to call (where appropriate), current yield and the yield to maturity of the security relative to other securities of comparable quality and maturity;
- b. The difference, or "spread", between the yield of the security and the yield of a comparable government security;
- c. The size of the issuer, the issuer's sensitivity to economic conditions and trends and the issuer's operative history;
- d. The size of the bond issue;
- e. The issuer's financial resources and financial condition, including leverage and cash flow to cover interest expense and principal repayment;
- f. Review of the terms under which securities are issued and the nature of and coverage under financial covenants;
- g. The experience and track record of the issuer's management;

- h. Market-technical factors, including the market tone and prevailing market conditions, supply and demand and the amount of emerging market bonds in issuance and being issued in primary bond markets;
- i. Underwriting factors, including size, capital and reputation of the lead underwriter, number of additional underwriters, and their track records.

The Sub-Fund is generally not expected to hold investments that, at the time of investment, are rated below “Caa1” by Moody’s or below “CCC+” by S&P, subject to the Investment Manager’s right to invest up to 10% of the Net Assets of the Sub-Fund in unrated bonds. Depending on market and issuer-specific conditions, the Investment Manager expects to dispose of investments that fall below “Caa1” by Moody’s or below “CCC+” by S&P.

The Sub-Fund may also invest up to 30% of the Net Assets of the Sub-Fund in high yield bonds whose issuers are not considered to be Emerging Market Issuers.

The Investment Manager may also make use of listed and OTC FDIs (including, but not limited to, futures, forwards, options and swaps) linked to bonds, interest rates and currencies for efficient portfolio management, hedging purposes and the reduction of risk only. The Sub-Fund will not make use of FDIs for investment purposes. The Sub-Fund is not expected to employ any leverage or gearing.

The Sub-Fund may hold cash and cash equivalents on an ancillary basis.

Investment Restrictions	In pursuing its Investment Objective and Investment Policy, the Sub-Fund will be subject to the Investment, Borrowing and Leverage Restrictions set out in the Section of the Prospectus entitled “Investment Objectives, Policies and Restrictions” .
Leverage	<p>The Sub-Fund is not expected to employ any leverage or gearing.</p> <p>The global exposure of the Sub-Fund arising out of its FDI positions will be measured on the basis of the commitment approach as set out in the MFSA Rules.</p>
Approved Regulated Markets	As per the Prospectus.

Details regarding the risk factors which should be considered by investors considering purchasing Investor Shares can be found in the Section entitled **“Specific Risk Factors”** below.

Risk Factors

IN EVALUATING THE POTENTIAL AND SUITABILITY OF AN INVESTMENT IN THE SUB-FUND, CAREFUL CONSIDERATION SHOULD BE GIVEN BY PROSPECTIVE INVESTORS TO THE SPECIFIC RISK FACTORS SET OUT BELOW AND THE RISK FACTORS SET OUT IN THE PROSPECTUS.

THE SUB-FUND MAY BE EXPOSED TO CERTAIN RISKS SPECIFIC TO EMERGING MARKETS, MOST OF WHICH ARE EXPLAINED BELOW:

Higher Volatility

The Sub-Fund may experience more rapid and extreme changes in value when investing in securities of certain international jurisdictions. This reflects certain emerging markets specific factors, among which lower depth, higher concentration and higher vulnerability to international political developments.

Poor Investor Protection

Emerging Market issuers might be subject to lax regulation. Insider trading prevention might be poorly enforced and corporate governance might be lacking in some emerging countries. The legal framework structure and accounting, auditing and reporting standards in certain emerging countries may not provide the same degree of investor protection or information to investors as would generally apply in major securities markets.

Furthermore, nationalisation, expropriation or other disruptive events such as foreign investment or exchange market controls could materially affect the sub-Fund.

The systems and procedures for trading and settlement of securities in emerging markets are less developed and less transparent.

Sovereign Credit Risk

Emerging countries are more likely to experience insufficient foreign reserves and/or excessive debt service burden which in turn affects their ability to repay its debt. Furthermore, some emerging countries might be dependent on expected disbursements from foreign governments, multilateral agencies and other foreign entities which may be conditioned on the implementation of economic reforms and/or other conditions. Failure to implement such reforms or achieve such conditions may result in the cancellation of the expected third parties' funds, which may further impair such debtor's ability or willingness to service its debt.

Enforcing legal rights can be difficult, costly and slow in some countries and can be particularly difficult against governments.

Risks Specific to Russian Securities

Although investment in Russian securities does not constitute the principal focus of the Sub-Fund, it may invest a portion of its assets in securities of issuers located in Russia. In addition to the risks disclosed elsewhere in this Offering Supplement and accompanying Prospectus, these securities may pose special risks. Russian companies or companies with Russian exposures/ties might be impacted by sanctions imposed by other countries on Russia, Russian companies or individuals or companies and individuals tied to Russia; this can affect the value of their securities as well as their liquidity.

Risks Specific to Chinese Securities

Although investment in Chinese securities does not constitute the principal focus of the Sub-Fund, it may invest a portion of its assets in securities of issuers located in China. In addition to the risks disclosed elsewhere in this Offering Supplement and accompanying Prospectus, these securities may pose special risks. The regulatory framework applicable to the Chinese securities market in general and to the foreign investors in particular is regularly tweaked and certain interpretations are deemed uncertain. Dealing in certain Chinese securities is restricted to licensed investors and the ability of the investor to repatriate its capital invested in those securities may be limited at times. The Sub-Fund cannot invest in China under the Qualified Foreign Institutional Investor (“QFII”), which might result in a lower than desired exposure to Chinese assets.

Other Emerging Market Specific Risks

Emerging Market securities are more sensitive than developed market securities to adverse economic, political or social events affecting the Issuer’s country or region.

Some emerging markets governments exercise substantial influence over the private economic sector which can put investors at a disadvantage. Many emerging market economies have export-driven or commodities-driven economies which leaves them dependent upon international trade.

Emerging Market issuers are generally subject to higher contagion risk, meaning that adverse conditions in a given region or even a change in market sentiment can propagate across countries and regions indiscriminately.

IT IS RECOMMENDED THAT PROSPECTIVE INVESTORS ALSO CONSULT THEIR OWN ADVISORS ON LEGAL, TAX AND FINANCIAL ISSUES THAT ARE RELEVANT FOR THEIR SPECIFIC SITUATION, AS THE INFORMATION HEREIN SHOULD BE REGARDED AS GENERAL INFORMATION.

INVESTMENT IN THE SUB-FUND SHOULD BE REGARDED AS A LONG TERM INVESTMENT. THERE CAN BE NO GUARANTEE THAT THE INVESTMENT OBJECTIVE OF THE SUB-FUND SET OUT HEREIN WILL BE ACHIEVED.
