Sub-Fund Specific Liquidity Management Tools ("LMTs")

For the purposes of the LMT framework described in the Prospectus, the Company on the advice of the Investment Manager has selected the following LMTs for the Sub-Fund (the "**Sub-Fund Specific LMTs**"):

- (i) a redemption gate (the "**Redemption Gate**"); and
- (ii) an Anti-Dilution Levy.

The Sub-Fund Specific LMTs may be activated, operated and deactivated in accordance with the LMT Policy of the Investment Manager, the Prospectus, this Offering Supplement and, where applicable, subject to such governance, oversight and approvals as may apply from time to time. The application of a Sub-Fund Specific LMT may affect investors' ability to redeem Investor Shares, the timing of the processing of dealing requests and/or the timing of payment of redemption proceeds.

(i) Redemption Gate

The Directors may, on the advice of the Investment Manager, if justified having regard to the interests of the Sub-Fund and its Shareholders and in accordance with applicable law, determine to activate a Redemption Gate.

The Investment Manager may consider activating a Redemption Gate where the total net redemption requests received for a given Redemption Day exceed five per cent (5%) of the Net Asset Value of the Sub-Fund calculated as at the relevant Valuation Point (the "**Activation Threshold**").

For the purposes of this section:

- (i) "net redemption requests" means the aggregate value of redemption requests received for the relevant Redemption Day less the aggregate value of subscription requests received for the same date, where applicable;
- (ii) the relevant percentage shall be calculated by reference to the most recently available official Net Asset Value prior to the relevant Redemption Day.

Exceeding the Activation Threshold shall not automatically result in the activation of a Redemption Gate. The Investment Manager shall determine, having regard to the liquidity profile of the Sub-Fund's assets, prevailing market conditions, expected cash flow and the best interests of the Shareholders, whether the activation of a Redemption Gate is necessary and proportionate as an LMT.

Upon activation of a Redemption Gate:

- (a) redemption requests shall be executed on a pro rata basis for all Shareholders submitting valid redemption requests for the relevant Redemption Day;
- (b) the aggregate value of redemption requests executed on that Redemption Day shall not exceed the redemption gate limit determined by the Directors, on the advice of the Investment Manager, for that Redemption Day, having regard to the liquidity profile of the Sub-Fund's assets, prevailing market conditions, available liquidity and expected cash flows, and the need to ensure the fair treatment of Shareholders;
- (c) all redemption requests shall be reduced proportionally so that each redeeming Shareholder has the same percentage of its redemption request executed.

The portion of any redemption request not executed as a result of the activation of the Redemption Gate (the "**Deferred Portion**") shall automatically be carried forward to the next Redemption Day and shall be treated as a redemption request received in respect of the next Redemption Day.

The Deferred Portion shall be processed in priority to redemption requests received for that subsequent Redemption Day but shall remain subject to the possible application of a Redemption Gate on the subsequent Redemption Day if the Activation Threshold is again exceeded.

No new redemption notice shall be required in respect of the Deferred Portion.

The Redemption Gate shall be temporary in nature and shall be assessed and reviewed periodically by the Investment Manager to ensure that it remains necessary and proportionate in the best interests of Shareholders.

The Redemption Gate shall cease to apply where the Investment Manager determines that the circumstances justifying its activation no longer exist and that the Sub-Fund is able to meet redemption requests in an orderly manner without prejudicing the interests of remaining Shareholders.

The Redemption Gate shall be applied uniformly to all affected Shareholders and Share Classes for the relevant Redemption Day.

(ii) Anti-Dilution Levy

The Directors may, on the advice of the Investment Manager apply an Anti-Dilution Levy in order to protect the Sub-Fund (and its Shareholders) from the dilution of the Sub-Fund's assets and/or performance that may result from the costs of dealing (including, for example, transaction costs, bid/offer spreads, taxes and market impact) arising from net subscriptions or net redemptions.

The Anti-Dilution Levy may be applied on subscriptions, on redemptions, or on both, where the Investment Manager determines that it is in the interests of Shareholders as a whole, including where there are significant net flows, stressed market conditions, elevated transaction costs and/or reduced market liquidity. It may be activated on a Dealing Day where:

- a. the aggregate amount of redemption orders exceeds the aggregate amount of subscription orders, resulting in net redemptions of more than ten per cent (10%) of the Net Asset Value of the Sub-Fund; or
- b. the aggregate amount of subscription orders exceeds the aggregate amount of redemption orders, resulting in net subscriptions of more than ten per cent (10%) of the Net Asset Value of the Sub-Fund.

In the case of net redemptions, the Anti-Dilution Levy shall be deducted from the amount paid to redeeming Investors. In the case of net subscriptions, the Anti-Dilution Levy shall be charged to subscribing investors.

The Anti-Dilution Levy shall be applied at a rate determined from time to time by the Investment Manager acting reasonably and in good faith, by reference to prevailing market conditions and the estimated dealing costs expected to be incurred by the Sub-Fund. The Anti-Dilution Levy shall not exceed one per cent (1%) of the relevant subscription order or redemption order (as applicable), calculated on the gross value of such order

(before deduction of the Anti-Dilution Levy), being (i) where the order is submitted as a value amount, the value amount stated in the order, and (ii) where the order is submitted as a number of Shares, the value of such Shares calculated by reference to the applicable Net Asset Value for the relevant Dealing Day.

Any Anti-Dilution Levy applied shall be for the account of the Sub-Fund (and not for the benefit of the Investment Manager) and shall be retained within the Sub-Fund.

Regulatory notification / reporting

Where applicable, the activation and/or deactivation of a Sub-Fund Specific LMT may give rise to regulatory notification or reporting requirements and the Company and/or the Investment Manager will comply with any such requirements as may apply from time to time.

Other LMTs

The Sub-Fund may also make use of other LMTs as set out in the Prospectus under the heading "Liquidity Management Tools".

SPECIFIC RISK FACTORS

IN EVALUATING THE POTENTIAL AND SUITABILITY OF AN INVESTMENT IN THE SUB-FUND, CAREFUL CONSIDERATION SHOULD BE GIVEN BY PROSPECTIVE INVESTORS TO THE RISK FACTORS SET OUT IN THE PROSPECTUS AS WELL AS TO THE FOLLOWING RISK FACTORS.

IT IS RECOMMENDED THAT PROSPECTIVE INVESTORS CONSULT THEIR OWN ADVISORS ON LEGAL, TAX AND FINANCIAL ISSUES THAT ARE RELEVANT FOR THEIR SPECIFIC SITUATION, AS THE INFORMATION HEREIN SHOULD BE REGARDED AS GENERAL INFORMATION.

INVESTMENT IN THE SUB-FUND SHOULD BE REGARDED AS A LONG TERM INVESTMENT. THERE CAN BE NO GUARANTEE THAT THE INVESTMENT OBJECTIVE OF THE SUB-FUND SET OUT HEREIN WILL BE ACHIEVED.

Investors money shall be invested in financial instruments and, where appropriate, in UCITS selected by the Investment Manager. These financial instruments and UCITS shall be subject to the evolution and fluctuations of the market. The risk profile of the Sub-Fund is suitable for an investment horizon of at least 3 years.

Like any financial investment, potential investors should be aware that the value of the Sub-Fund's assets is subject to the fluctuations of the international equity and bond markets and that it may vary substantially. Investors receive no guarantee that they will get back the invested capital.

The risk factors described below are not exhaustive. It is up to each Investor to analyse the risk associated with such an investment and to form his/her own opinion independent of the Investment Manager of the Sub-Fund, where necessary seeking the opinion of any advisors specialised in such matters in order to ensure that this investment is appropriate in relation to his/her financial situation.

The discretionary management style is based on expectations regarding the performance of different markets (equities, bonds). There is a risk that the Sub-Fund might not be invested in the best-performing markets at all times.

Equity risk: The Equity Component is exposed to the equity risk of the eurozone, international and emerging markets through investments in financial instruments. Furthermore, regarding the small and mid-cap markets, the volume of stocks listed on a stock exchange is relatively low; market downturns are therefore more acute and more abrupt than for large caps. The net asset value of the Sub-Fund may therefore decline rapidly and significantly.

Risk of investing in emerging markets: Investments made in emerging markets carry important risks including political, economic and concentration risks. Political or social instability could affect the value of investments or result in the complete loss of such investments. Investors are reminded that the operating and supervisory conditions of the emerging markets may deviate from the standards prevailing on the large international markets. Also, securities of some emerging markets may be less liquid and more volatile than securities traded in developed markets.

Interest rate risk: Interest rate risk results in a decline in the net asset value in the event of a rise in interest rates. When the sensitivity of the portfolio is positive, a rise in interest rates may lead to a reduction in the value of the portfolio. When the sensitivity of the portfolio is negative, a fall in interest rates may lead to a reduction in the value of the portfolio.

REITs: REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. The Sub-Fund will not invest directly in equity or mortgage REITs but will seek to gain exposure to REITs via UCITS-eligible ETFs and/or Collective Investment Schemes. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. An equity REIT may be affected by changes in the value of the underlying properties owned by the REIT. REITs are dependent upon the skills of their managers and are not diversified. REITs are generally dependent upon maintaining cash flows to repay borrowings and to make distributions to shareholders and are subject to the risk of default by lessees or borrowers. REITs whose underlying assets are concentrated in

properties used by a particular industry, such as health care, are also subject to risks associated with such industry. REITs are also subject to interest rate risk. When interest rates decline, the value of a REIT's investment in fixed rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investment in fixed rate obligations can be expected to decline. REITs may have limited financial resources, may trade less frequently and in a limited volume and may be subject to more abrupt or erratic price movements than larger company securities.
